Hi Curt,

I've been informed by Derek Ragon that he is available for your contact at your earliest convenience on these matters pertaining to SEMS (i.e. technical issues, questions on contract, etc).

Derek is the Team Leader for the Information Management Team in EPA Region 6 and his contact info is: 214.665.7362, ragon.derek@epa.gov

Thanks,

Stephen L. Tzhone
Superfund Remedial Project Manager

Hi Stephen,

Could I get more specific information on the "technical issues with [EPA's] major system migration?"

From years of working with IT departments and contractors in business, I know better than to accept this standard, generic "technical issues" excuse from technologists.

To my mind, it's like sanitation workers saying they have a "garbage issue" when customers call to complain about their trash not being picked up.

Curt

Hi Stephen,

Thanks for the response.

May I ask: who are the contractors engaged for this work, and what are the identifying contract numbers?

Curt

Hi Curt,

I have heard back from the Information Management Team regarding your question on SEMS deployment.

The information is: EPA is continuing to work thru technical issues with our major system migration and apologize for the delay.

I do anticipate that the red error message you see will be updated.

Thanks,

Stephen L. Tzhone

Hi Curt,

Thanks for the email. Your question is valid and I have requested clarification from the Information Management Team.

I'll let you know once we receive the information, thanks.

Thanks,

Stephen L. Tzhone

Dear Stephen,

Please see the error message in red on attached screen shot found at <http://cumulis.epa.gov/supercpad/cursites/csitinfo.cfm?id=0600124> which states:

"The Superfund Program is in the process of deploying a new information system, the Superfund Enterprise Management System (SEMS) which is replacing CERCLIS. CERCLIS was frozen as of November 12, 2013. Updated data will become available in early 2014 when SEMS is fully operational."

Can you tell me when the "Superfund Enterprise Management System (SEMS)" with its "updated data will become available in early 2014" as the site states?

Thank you.

Curt Grisham

Cleanup Progress Summary

Construction Complete

Physical cleanup activities have been completed.
[view detailed list of cleanup activities at this site >>](#)

The National Priorities List (NPL) is the list of the most hazardous sites across the U.S. and its territories.

This site is on the NPL and is known as a Final NPL site ([see glossary](#)).

Potentially Responsible Parties (PRPs) were involved in the cleanup effort ([see glossary](#)).

Superfund law requires that EPA give communities information about site progress and plans so that they can be actively involved in site cleanup decisions. [Learn more about community involvement at this site >>](#)

Cleanup Impact Summary

At each site, EPA assesses the risk to humans and the environment and determines the best approach to address the risk. During initial site studies and cleanup, EPA determines if current human exposures to contaminants are under control and takes actions to control any possible human exposures until cleanup has been completed. Once complete, cleanup provides long-term human health and environmental protection at the site.

OK Current human exposures at this site are under control

[see glossary definition for "Human Exposure Environmental Indicator Measure." >>](#)

At each site with known ground water contamination, EPA documents whether ground water contamination is below protective risk-based levels or, if not, whether the migration of contaminated ground water is stabilized.

OK Contaminated ground water migration is under control

[see glossary definition for "Contaminated Ground Water Migration Environmental Indicator Measure." >>](#)

Contamination

Contaminants (i.e., hazardous substances, pollutants or contaminants) can be found in several different types of materials on the site including soil and other solid-based media and water or another liquid-based medium ([see glossary](#)).

The contaminants listed via the links below are considered the contaminants of concern ([see glossary](#)) to be addressed by cleanup actions at the site.

Contaminated Media: Groundwater, Soil

EPA classifies contaminants found into groups or types (listed below). To view all contaminants of concern at the site click on the "view contaminants of concern at this site" link.

Types of Contaminants: Base Neutral Acids, Dioxins/Dibenzofurans

[see glossary definition for "types of contaminants" >>](#)
